

Clematis 'Helios'

- ☼ A small-flowered, coconut-scented variety, 2"-4" yellow flowers are nodding and lantern-shaped when they emerge, becoming flatter as the petals open upwards. Flowers are followed by decorative seed pods which can be used in dried flower arrangements
- ☼ Blooms only on the current year's growth. Plants should be cut back in early spring to two strong sets of buds on each stem as close to ground level as possible. This will provide a plant with blooms that start near ground level and continue to the top.

Height: 6 - 8 Feet

Zone: 4
