

# Flowering Dogwood

*Cornus Florida*

- ❁ A beautiful small native tree covered with showy white flower bracts in May. Develops full broadly rounded crowns and likes fertile moderately dry soils. Usually found growing naturally along the edges of forests where it receives full sun to light shade
- ❁ Red fruit appears in the fall along with bright red foliage
- ❁ Flowering dogwood are very thin barked and do not like to be damaged especially by string trimmers!
