

Blue Wonder Toad Lily

Tricyrtis 'Blue Wonder'

- ❁ Dark green leaves with long arching stems topped with white starfish-like flowers heavily spotted with blue-purple from late summer into fall
- ❁ No shade garden should be without toad lilies. These Asian curiosities bloom with orchid-like flowers that demand a close look, when the garden is winding down in fall. They do best in light shade in humus-rich soil that retains moisture, and are suitable for less formal parts of the garden.
- ❁ Spreads, but is not aggressive
