

Dawn Redwood

Metasequoia Glyptostrobooides

❁ An ancient tree that knew the dinosaurs but is well-suited to modern landscape plantings. Thought to be extinct until the 1940's. Dawn Redwood is a deciduous conifer producing small, round 1/2" to 1" cones. It has a neat pyramidal shape in youth, maturing into a more rounded crown. The bright green, feathery leaves turn orange-brown or reddish-brown in the fall before falling off for the winter. Fast-growing and easily transplanted. drained soils. One of the fastest-growing trees available

Height: 75 Feet

Zone: 5

Full Sun

Moist, Well-Drained
