

Swamp Rose

Rosa palustris

- ❁ Arching reddish branches with curved prickles are clad with medium to dark green. Fragrant, single pink roses with contrasting yellow centers bloom from late spring to early summer & are followed by pea-sized red hips. Leaves turn attractive shades of red in fall.
- ❁ Found in swamps and wet woods .
Attracts bees & butterflies
- ❁ Native from Ontario east to Nova Scotia

Height: 3-6 Feet
