

Barren Strawberry

Geum fragarioides

- ❁ Barren Strawberry is perennial, ever-green wildflower that can be used as groundcover and is native to Eastern Canada and United States. It can be found naturally in forests and stream-banks. Small yellow flowers grow where there are woods, thickets, and clearings.
- ❁ Makes an attractive ground cover. Excellent for erosion control or the woodland garden.
- ❁ Also known as Waldsteinia
