

# Clematis 'Yukikomachi'

- ❁ Pale lavender flowers with subtle green-yellow stamens appear from May to June, followed by a second flush in late summer. Delicate colouring is best preserved when grown in a part shade
- ❁ A light pruning in late winter\early spring will help produce a well balanced plant. Any weak or dead wood should be removed at this time
- ❁ Clematis roots like to be kept cool so cover them with mulch or a ground cover

**Height: 8 Feet**

**Zone: 4**
