

John Clayton Honeysuckle Vine

Lonicera x 'John Clayton'

- ☼ Yellow tubular flowers adorn this unique honeysuckle in spring and the sporadically throughout the summer. Softly fragrant
- ☼ Attracts hummingbirds and butterflies to your garden. Extremely easy to grow
- ☼ This vine climbs by twining its stems around narrow supports, like small branches, wires, narrow poles or wood stakes. It won't twine around the trunk of a tree as its diameter is too large and it cannot attach itself to a flat surface without wires for it to curl around

Height: Will Climb 10 Feet

Zone: 4
