

# Blue Beech/Musclewood

*Carpinus caroliniana*

- ❁ The pretty leaves open char- treuse in spring and filter light in- to a golden shade that is one of this trees most attractive attrib- utes. The autumn color is a sub- tle orange to yellow and, as the leaves are small, there is rarely much litter in winter.
- ❁ Blue Beech is a native, large shrub or small tree with a wide- spreading, flat-topped crown,
- ❁ Seeds, buds and catkins are eaten by songbirds, ruffed grouse, ring-necked pheasants, bobwhite and turkey
