

Pink Muhly Grass

Muhlenbergia Capillaris

- 🌸 Tidy clumps of very fine blue foliage provide a show stopping source of late season colour and texture in the garden. Late summer or fall plant explodes into bloom with clouds of airy pink panicles that last for weeks. Drought tolerant.
- 🌸 Provides a good vertical accent in borders and is also effective en masse.
- 🌸 Leave foliage in place over winter for interest. Cut back to the ground before new growth appears in spring

Height: 3 Feet

Zone: 5b
