

# Brunswick Blueberry

*Vaccinium angustifolium* 'Brunswick'

- ☼ Produces small, sky blue berries that are firm and flavorful, similar to that of a wild blueberry. Dense foliage turns brilliant red or orange in the fall.
- ☼ Lowbush variety that makes a 1 - 2 feet dense ground cover if planted in groups.
- ☼ Needs acidic soil (adding compost will acidify your soil). Although self-fertile, cross-pollination produces the best fruit crop

**Height: 1-2 Foot**
