

Fragrant Honeysuckle Vine

Lonicera Periclymenum 'Serotina'

- ❁ Extremely fragrant, creamy-yellow and red gorgeous two tone flowers followed by red berries. Attracts hummingbirds and butterflies to your garden. Blooms continuously from June till October
- ❁ Climbs by twining its stems around narrow supports, like small branches, wires, narrow poles or wood stakes. It won't twine, say, around the trunk of a shade tree as its diameter is too large and it cannot attach itself to a flat surface without wires for it to curl around

Height: Will Climb 15 Feet

Zone: 3
