

# Hardy Apricot

*Prunus armeniaca*

- ☼ Lightly fragrant white to pale pink solitary flowers are followed by fleshy fruit on this well branched tree. Blossoms are followed by a dense canopy of lush green foliage.
- ☼ Self pollinating but would benefit from another species of prunus nearby.
- ☼ Fruit is usually firm and not juicy, with a taste ranging from tart to sweet. Often used for jams, jellies or dried snacks,
- ☼ Will thrive in full sun protected from the wind.

**Height: 25-40 Feet    Zone: 5**

Full Sun

Moist, Well-Drained
