

Calgary Carpet Juniper

Juniperus Sabina 'Mona'

- Superior evergreen groundcover with a very low, spreading habit and attractive lime green foliage and arching branches. Very durable landscape specimen that tolerates heat, cold and drought, perfect choice for erosion control coverage on cut slopes and natural banks. Makes an excellent winter structural plant for mixed borders that tend to look too barren in the colder months.

Height: 9 Inches (can spread 8 ft wide) Zone: 5

Calgary Carpet Juniper is in used pots, please disregard any codes written on the pots.
