

Climbing Hydrangea

Hydrangea Anomala Petiolaris

- ❁ Fragrant creamy white blooms adorn this self clinging vine. Blossoms are composed of a lacy centre of flowers ringed with a bracelet of larger florets. The effect is breathtaking
- ❁ Climbs by aerial rootlets. It is at its best when grown on the trunk of a tree or covering the face of a wall
- ❁ Considered by many to be the 'Cadillac' of vines

Height: as tall as structure

Zone: 4
