

Pearly-Everlasting

Anaphalis margaritacea

-  Tiny yellow flowers, enclosed by white papery bracts, often mistaken for petals are clustered at the top of erect stems.
-  Overall appearance is a pearly mound; a nice shape and color for a garden edge. Great cut flower for arrangements.
-  In the spring, this plant is a larvae host for the American Lady Butterfly.
-  Native to Ontario & the rest of Canada

Height: 2-3 Feet
