

Yellow Birch

Betula alleghaniensis

- ❁ The largest of the birch species, yellow birch (also known as curly birch) can reach a diameter of 36 inches or more and may live as long as 300 years. It prefers moist, fertile soil and sometimes grows along the edge of swamps.
- ❁ Yellow birch trees produce seeds that are enjoyed by finches and other wintering birds. A beautiful decorative tree with its golden/copper thin shaggy bark. The bark and wood is used to produce wintergreen essence.
- ❁ Native to Ontario & Quebec
