

Pinky Promise Snowberry

Symphoricarpos doorenbosii 'Kolmpica'

- ❁ Small mounding shrubs look like pink gum balls exploded all over them when in fruit! Plump, round berries form in late August and continue into early fall for an extraordinary display.
- ❁ Great for porch and patio pots or mixed borders, snowberries are tolerant of a variety of soils but perform best with some clay. Berries can be food for birds or used in flower arrangements.
