

Sneezeweed

Helenium autumnale

- ❁ Clusters of daisy-like flowers with distinctive wedge-shaped, bright yellow rays and prominent, dome-like, dull yellow center disks. Flowers appear over a lengthy late summer to autumn
- ❁ Great for mixed borders, naturalized areas or in moist soils along bodies of water.
- ❁ Also known as Yellow Star & Helen's Flower
- ❁ Native to all of Canada

Height: 3-5 Feet

Zone: 3
