

Snow In Summer

Cerastium Tomentosum 'Celine'

A very useful groundcover often grown in dry, sunny areas with poor soil. Plants form a low, fast-spreading mat of silvery-grey leaves, studded with tiny white star flowers in late spring and early summer. An indestructible choice for difficult sites. Beautiful spilling over rock walls or on steep sunny slopes, used as a lawn substitute. Plants should be clipped hard or mowed (to 2 inches) after blooming to maintain a tidy habit

Height: 4-6 Inches

Zone: 3
