

Ginkgo Tree

Ginkgo biloba

Distinctive two-lobed, somewhat leathery, fan-shaped, rich green leaves with diverging veins. Leaves turn bright yellow in fall. Ginkgo trees are commonly called maidenhair trees in reference to the resemblance of their fan-shaped leaves to maidenhair fern leaflets

Bark on older specimens of the tree becomes deeply furrowed

Only surviving member of a group of ancient plants believed to have inhabited the earth up to 150 million years ago.

Height: 50-80 Feet

Zone: 3

Full Sun

Deer

Low Maintenance
